

**CITY**

**Kitchen calls:** Well, this is literally the answer for tomorrow's fuel problems. *Envirofit* has launched a range of clean burning biomass cookstoves that they say reduces toxic emissions by as much as 80% and hold your breath, reduces cooking time by 40%. Details on <http://www.envirofit.org> or 080 41153808 or 9343333722.

**Eco trend**

A green biomass cookstove with a black lid and a metal stand. The stove is cylindrical with a black handle on the side and a black metal stand at the bottom. The lid is slightly ajar, revealing the interior. The background is a light yellowish-green.
